

# Sample HR Policy Handbook

Fictional Demo Company: AtlasWorks AI Inc.

Created for PolicyGPT Enterprise RAG testing

This PDF is intentionally fictional and safe for public demo use. It contains no real employee data, no confidential company information, and no legal advice. Its purpose is to test document upload, PDF text extraction, chunking, retrieval, page citations, confidence scoring, and unsupported-answer fallback behavior.

| Field          | Value                                                                                 |
|----------------|---------------------------------------------------------------------------------------|
| Document owner | People Operations                                                                     |
| Version        | 1.0                                                                                   |
| Effective date | January 1, 2026                                                                       |
| Review cycle   | Annual                                                                                |
| Applies to     | All full-time, part-time, contract, intern, and co-op workers unless stated otherwise |

## Suggested test questions for this project

- What is the remote work equipment allowance?
- How many days in advance should employees request planned vacation?
- What should employees do if they see harassment or retaliation?
- Are employees allowed to paste confidential information into public AI tools?
- What does the policy say about expense receipts?
- Unsupported test: What is the CEO's home address?

# Table of Contents

1. Employment Classification and Work Schedule
2. Attendance, Time Off, and Leaves
3. Remote and Hybrid Work
4. Code of Conduct, Harassment, and Respectful Workplace
5. Confidentiality, Data Privacy, and AI Tool Use
6. IT Acceptable Use and Security Responsibilities
7. Expense Reimbursement and Business Travel
8. Performance Reviews, Coaching, and Corrective Action
9. Reporting Concerns and Non-Retaliation
10. Acknowledgment and Document Limits

## **RAG testing note**

The sections are intentionally written in policy-style language with clear facts, numbers, and decision rules. This makes it easier to test whether a retrieval system returns page-level evidence instead of guessing.

# 1. Employment Classification and Work Schedule

## Purpose

AtlasWorks AI Inc. uses employment classifications to clarify eligibility for pay practices, benefits, scheduling expectations, and policy coverage. Classifications do not create a guarantee of employment for any specific period.

## Employment categories

Full-time employees are normally scheduled for 30 or more hours per week. Part-time employees are normally scheduled for fewer than 30 hours per week. Temporary employees are hired for a limited project or period. Interns and co-op students may follow additional school or program requirements. Independent contractors are not employees and are governed by their written contract.

## Core work hours

The standard business day is 9:00 a.m. to 5:00 p.m. local time, Monday through Friday. Teams may set core collaboration hours between 10:00 a.m. and 3:00 p.m. local time. Employees should be reachable during core hours unless they are on approved leave, in a meeting, or performing approved focused work.

## Meal and rest breaks

Employees should take reasonable meal and rest breaks consistent with local employment standards and operational needs. Managers may not discourage legally required breaks.

## Overtime and approval

Non-exempt employees must receive written manager approval before working overtime. Overtime must be accurately recorded. Employees may not work off the clock or underreport hours.

## 2. Attendance, Time Off, and Leaves

### Attendance expectations

Employees are expected to start work on time, attend scheduled meetings, and notify their manager as early as possible if they will be late or absent. Repeated unapproved absences may lead to coaching or corrective action.

### Planned vacation requests

Employees should request planned vacation at least 10 business days in advance whenever practical. Managers approve requests based on staffing needs, project deadlines, fairness, and applicable law.

### Sick time

Employees who are ill should notify their manager before the start of the workday or as soon as reasonably possible. Employees should not report to an office location when they have symptoms that could reasonably put others at risk.

### Emergency leave

For urgent personal or family emergencies, employees should contact their manager or People Operations as soon as they are safely able to do so. Documentation may be requested only where allowed by law and company policy.

### Job-protected leaves

Leaves such as parental leave, medical leave, compassionate care leave, bereavement leave, jury duty, or other statutory leaves will be handled according to applicable employment standards.

## 3. Remote and Hybrid Work

### Eligibility

Remote and hybrid work may be approved when the employee's role, performance, security requirements, and team needs allow it. Approval is not automatic and may be changed if business needs change.

### Work location

Employees approved for remote work must maintain a safe, private, and reliable workspace. Employees may not regularly work from another province, state, or country without written approval from People Operations and Finance due to tax, payroll, privacy, and employment law considerations.

### Equipment allowance

Eligible remote or hybrid employees may request a one-time equipment allowance of up to CAD 300 for approved ergonomic or productivity items. Receipts are required, and purchases must be approved before reimbursement.

### Availability

Remote employees must remain available during agreed working hours, attend required meetings, and keep calendars reasonably current. Remote work is not a substitute for dependent care or personal leave.

### Security at home

Confidential conversations should not be conducted where unauthorized people can overhear them. Company devices should be locked when unattended, including at home.

## **4. Code of Conduct, Harassment, and Respectful Workplace**

### **Professional conduct**

All workers are expected to act honestly, respectfully, and professionally. Employees should communicate clearly, keep commitments, and avoid behavior that damages trust, safety, or the company's reputation.

### **Respectful workplace**

AtlasWorks AI Inc. does not tolerate harassment, bullying, discrimination, intimidation, threats, or retaliation. This applies in offices, remote meetings, work events, messaging tools, email, and any other work-related setting.

### **Examples of prohibited behavior**

Prohibited behavior may include unwanted comments about protected characteristics, repeated insults, sexual comments, exclusionary conduct, threats, doxxing, mocking accents, spreading malicious rumors, or pressuring someone to ignore a policy.

### **Manager responsibility**

Managers must respond promptly when they observe or receive a concern about harassment, discrimination, safety, retaliation, or serious misconduct. Managers should not promise absolute confidentiality because the company may need to investigate.

### **Conflict of interest**

Employees must disclose actual or potential conflicts of interest, including outside work, vendor relationships, family reporting relationships, gifts, or financial interests that could affect business judgment.

## 5. Confidentiality, Data Privacy, and AI Tool Use

### Confidential information

Confidential information includes employee records, customer data, source code, credentials, product roadmaps, financial information, unreleased research, legal documents, security incidents, vendor pricing, and internal strategy.

### Minimum necessary access

Employees may access confidential information only when they need it for authorized work. Access should not be used for curiosity, personal benefit, or sharing outside the approved business purpose.

### AI tool restrictions

Employees must not paste confidential information, personal data, customer data, proprietary code, internal documents, or security details into public AI tools unless the tool has been approved by Security and Legal for that data category.

### Approved AI use

Approved AI tools may be used for drafting, summarizing, brainstorming, coding support, and analysis when the input data is permitted. Employees remain responsible for reviewing AI outputs for accuracy, bias, confidentiality, and policy compliance before use.

### Personal information

Personal information must be collected, used, retained, and disposed of only for approved business purposes. Employees should report accidental disclosure of personal information to Security and People Operations immediately.

## 6. IT Acceptable Use and Security Responsibilities

### Account security

Employees must use unique passwords or company-approved password managers and must not share credentials. Multi-factor authentication must remain enabled where provided.

### Device protection

Company devices must use approved security settings, screen locks, encryption, and endpoint protection. Lost or stolen devices must be reported to IT immediately, preferably within one hour of discovery.

### Software installation

Employees may install only approved software on company devices. Browser extensions, developer tools, automation scripts, and open-source packages should be used carefully and must not bypass security controls.

### Phishing and suspicious activity

Employees should report suspicious emails, login prompts, unusual file requests, or suspected phishing attempts to IT Security. Employees should not forward suspicious attachments to coworkers.

### Use of company systems

Company systems are provided for business use. Limited personal use may be allowed if it is lawful, does not interfere with work, and does not create security, harassment, or reputational risk.

## 7. Expense Reimbursement and Business Travel

### General rule

Employees may be reimbursed for reasonable, necessary, and pre-approved business expenses. Expenses must have a clear business purpose and must comply with budget limits.

### Receipts

Itemized receipts are required for expenses over CAD 25. Credit card slips alone are not sufficient when an itemized receipt is available. Missing receipts require a written explanation and manager approval.

### Submission deadline

Expense reports should be submitted within 30 calendar days of the expense date. Late submissions may be delayed or denied unless an exception is approved by Finance.

### Travel booking

Business travel should use economy class airfare unless an exception is approved in advance. Employees should choose safe, reasonable lodging near the work location and avoid luxury upgrades unless justified by business need.

### Non-reimbursable expenses

The company does not reimburse personal entertainment, traffic fines, excessive alcohol, family travel, unauthorized upgrades, personal subscriptions, or expenses that violate law or policy.

## 8. Performance Reviews, Coaching, and Corrective Action

### Performance cycle

Formal performance reviews normally occur twice per year. Managers should also provide regular feedback throughout the year so that employees are not surprised by review outcomes.

### Goal setting

Employees and managers should define goals that are specific, measurable, relevant to business priorities, and realistic for the review period. Goals may include technical delivery, collaboration, customer impact, quality, learning, and leadership behaviors.

### Coaching

When performance concerns arise, managers should first provide clear expectations, examples, support, and a reasonable opportunity to improve unless the issue is severe misconduct or safety-related.

### Corrective action

Corrective action may include verbal coaching, written warning, performance improvement plan, suspension, reassignment, or termination depending on severity, history, impact, and applicable law.

### Documentation

Managers should document significant performance concerns, employee responses, agreed actions, timelines, and follow-up outcomes. Documentation should be factual, respectful, and stored only in approved systems.

## 9. Reporting Concerns and Non-Retaliation

### Reporting channels

Employees may report concerns to their manager, another manager, People Operations, Security, Legal, or the confidential ethics mailbox at [ethics@example.atlasworks.test](mailto:ethics@example.atlasworks.test). Emergencies should be handled through local emergency services first.

### Types of concerns

Reportable concerns include harassment, discrimination, retaliation, wage concerns, safety risks, fraud, privacy incidents, security incidents, conflicts of interest, policy violations, or suspected unlawful conduct.

### Non-retaliation

AtlasWorks AI Inc. prohibits retaliation against anyone who raises a concern in good faith, participates in an investigation, refuses to violate policy, or asks for guidance. Retaliation can include demotion, threats, exclusion, schedule punishment, or negative treatment because of the report.

### Investigation approach

The company will review concerns as promptly and fairly as practical. Information will be shared only with people who need it to assess, investigate, respond, or comply with legal obligations.

### False reports

Knowingly false reports or intentionally misleading information may lead to corrective action. A report is not false only because it cannot be proven after review.

## **10. Acknowledgment and Document Limits**

### **Employee acknowledgment**

Employees may be asked to acknowledge that they have received, read, and understood this handbook. Questions should be directed to People Operations before signing an acknowledgment.

### **Policy updates**

AtlasWorks AI Inc. may update, replace, interpret, or discontinue policies at any time, subject to applicable law. The current version in the approved document repository controls over printed or downloaded copies.

### **No contract guarantee**

This handbook is not an employment contract and does not guarantee employment for a specific period. Where local law requires different terms, local law and written employment agreements take priority.

### **RAG demo limitation**

This document is designed for retrieval testing. A RAG assistant should answer only from this document when it is the uploaded source and should say that evidence is unavailable when a question asks for facts not contained here.

### **End of sample policy**

No real company, employee, customer, or legal information is included in this sample. The email address and company name are fictional.
